

## Minnesota WQS Applicable to the St. Louis River

Minn. R. ch. 7050.0470

(192) St. Louis River, [WR] (T.58, R.12, S.21, 22, 27, 28, 31, 32, 33; T.58, R.13, S.36):  
**2B, 3B;**

Since not specifically listed the default designation found in 7050.0430 also apply, namely, **4A, 4B, 5 and 6.**

Other downstream waters from the NorthMet site include a Class 2A (cold water trout stream) tributary to the Partridge River and Class 2Bd (Colby Lake).

I didn't recheck this but the WR location listed by township/section/range is the mouth of the river near the city of Cloquet which is just past the FdL reservation.
